

The background of the slide features a close-up, slightly blurred image of a person's hands typing on a laptop keyboard. Overlaid on this image are several semi-transparent digital graphics: a bar chart in the top left, a line graph in the middle left, and three interlocking gears in the bottom left. Additionally, several location pin icons are scattered across the right side of the image, appearing to float above the keyboard. A solid orange horizontal bar is positioned in the top left corner.

Capstone Project Event Booking App

- by Sarthak Lembhe

Key Takeaways/Learnings from this Training

The key learnings I had in this training:

- Learnt ASP.NET Core, MVC, Web API and C# Console Apps,
- Understood coding conventions,
- Front-end implementation using Angular, and HTML/CSS,
- SQL/LINQ/ADO.NET,
- Clean Architecture,
- Structured programming,
- State and memory management

A great learning and training session to start my career as an ASP.NET Software Engineer.

Problem Statement of the Capstone Project

Short Description of my problem statement,

- This Event Booking Application solves the problem of booking online tickets .
- All users registered are authenticated and authorized.
- It consists of Interactive User dashboard.
- User can book tickets for events in this web application.
- They can check their bookings and the hassle of offline ticket booking is solved.

TechStack Used

- ASP.NET Web API (Version 8)
- Postman/Swagger
- C# (Back-end)(Version 12)
- JWT (For authentication & authorization)
- Angular(Front-end)(Version 18)
- Local SQL-DB(SQL-SERVER)
- CSS for styling

Conclusion

- This Online Event Booking Web App provides users a quick way to Book tickets online.
- It helps them to login easily and have easy access to the ongoing events from anywhere.
- The application is also authenticated using JWT security token.
